ZiggyBox™ Mini NVIDIA® Jetson™ Computer System

High Performance, Compact Size
The ZiggyBox provides a compact and highly cost-effective solution for AI at the edge and machine learning applications for industrial and lab applications. It is based around the NVIDIA® Jetson™ TX2/TX2i advanced computing module with NVIDIA Pascal™-family GPU technology. The Jetson module is housed in a rugged miniature enclosure measuring only 2.5 x 2.6 x 3.8” (63 x 67 x 96mm).

ZiggyBox offers easy access to the most popular Jetson I/O features, including Ethernet, USB 3.0 / 2.0 / OTG ports, HDMI display, and 2 RS-232 ports. The built-in carrier board adds a valuable data acquisition circuit with real-world analog and digital I/O features and software support.

An integrated heat sink provides reliable operation at up to 80°C without forced air. With its integrated Linux OS and table-top / DIN rail mounting options, ZiggyBox is ready to be deployed wherever the combination of high-performance computing and ultra-compact size are required.
